Crazy Taxi Crazy Taxi is a 2D arcade style racing video game, released by SEGA's American division in 1999. It was ported to Dreamcast and re-released in 2004 with the title Crazy Taxi 3: High Roller. Gameplay The object of the game is to take on the role of a taxi driver who plays a designated area and delivers passengers to their specified destinations in the fastest time possible. The game consists of a single-player mode of 30 stages which the player completes under a set time limit, and a two-player mode of eight levels that must be completed in just a few minutes. The player picks up passengers at random and transports them to the locations of their tickets, a lengthy process which requires a lot of caution. Trophies In the game the player is awarded money which can be used to buy upgrades for the taxi. The upgrades come in three flavours: the engine upgrade (to up the speed), the gearbox upgrade (for more handling), and the tire (which gives the taxi better traction). It is also possible to purchase and sell items for the taxi that can be used in the game, such as a gasoline tank, pick up and drop off locations, etc. Some items are also beneficial for the passengers. Each stage has two objectives, one of them being avoiding obstacles along the route and the other being delivering passengers in the shortest amount of time. Comic-style story When the game is played at the start of the single player game mode, an epilogue is seen where the player's taxi driver, Richard, dies in a tragic traffic accident. The game is told from his perspective, where he is seen driving to pick up passengers, and then narrates in a comic style, his failures that are going on as well as his successes. Crazy Taxi is also a take on a running gag seen in SEGA's previous racing game, Daytona USA. In this the player crashes, and then (at a later point in the game) is launched into space, while watching as the events occurring on Earth below. There is also a scene where the player takes a shuttle to the moon, only to crash on a lunar surface, where (at a later point in the game) a gigantic dragon appears and mauls the vehicle, and (yet later in the game) the game suddenly changes to an endless mode of 'no time limit', and the game is now told from Richard's point of view as he continues to make
