This study aims to assess relationships among alcohol, cannabis and other illicit drug use in a sample of adolescent siblings. The sample consisted of 330 pairs of adolescent siblings. A complete structured interview was administered to all participants to ascertain current use of a wide range of substances. Correlations and hierarchical analyses were used to investigate potential relationships among the variables. Significant correlations were found between self-reported cannabis and both alcohol and other drug use. Age-of-onset analyses revealed that the onset of alcohol use and of cannabis use were associated; as were the onset of alcohol and drug use among the males. There was some evidence of an association between substance use and the onset of drug use. The data also revealed a relationship between alcohol and cannabis use, supporting the notion that cannabis provides some enticement for alcohol use. The findings of this study provide support for the notion that there is a genetic influence on patterns of substance use, with evidence of co-morbidity with alcohol and cannabis. *Vexillum bernicchii* *Vexillum* (*Pusia*) *bernicchii* is a species of small sea snail, marine gastropod mollusk in the family Costellariidae, the ribbed miters. Description Distribution References Turner H. 2001. Katalog der Familie Costellariidae Macdonald, 1860. Conchbooks. 1-100 page(s): 77 External links *bernicchii*

Historical Information The sacred temple of Mithras located on the Ponte Paterna promontory, one of the most striking sights in the region, is quite understandably, the symbol of Zaragoza. It was endowed with special architectural characteristics, which gave it its sacred image of a huge bull, surrounded by a pantheon of other gods which included Orpheus (Orpheus was the only son of the beautiful Eurydice and the divine king of Thrace, Orpheus, who accompanied him to the underworld and was also an arancière, musician, cithara-player and prophet; this legend was able to link the name of the whole town of Zaragoza with Orpheus), Demeter and Persephone. All of these gods were associated with the seasonal renewal of life and the seasons, which supplied the name of the town during its founding days, "new life". This architectural section, located in the nearby Valle de Paterna, is a museum of historical and Roman significance, with many archaeological finds, including Roman baths, theaters, statues, altars and gates. It includes the memory of Zaragoza, one of the first cities founded in Spain, the oldest Roman fortress in Spain, and the largest factory with its own workers barracks. Docker (software) Docker is a software container platform that allows Linux-based software to be run on top of various operating systems in an isolated form, without affecting other host applications. Docker is designed as a tool for developing, deploying, and managing container-based micro 1cb139a0ed
