This invention relates to semiconductor processing technology, and more particularly to a method and structure for reducing the amount of electrical charge that migrates in the sidewall of a contact opening in an interlayer dielectric material. In the manufacture of integrated circuits, devices such as diodes, transistors, and other electronic circuit devices are formed on a semiconductor substrate. The devices and material layers of semiconductor and dielectric materials are then patterned to define circuitry. Shallow trench isolation (STI) is one such technique used for isolation of transistors in an integrated circuit. In conventional STI the semiconductor substrate is etched away from the areas where trenches are to be formed to provide a relatively smooth trench surface that provides a suitable surface for the subsequent filling of the trenches with dielectric material. The area of the smooth trench surface should be large compared to the depth of the trenches such that a smooth surface is obtained that has a thickness that does not unduly reduce the width of active regions of the devices. Achieving this result is normally accomplished by first forming a pad oxide layer in

"Active Desktop Calendar 7.94 Build 101215 32bit Serial [TrT-Tc.rar.Compassion Over Killing, an animal-rights organization focused on behalf of the most marginalized members of the animal kingdom, has always found room in its organization for writers and artists. While food and fashion magazines, as well as mainstream culture and pop culture outlets, may have long ignored animal rights in favor of using animal imagery to make a point, Compassion Over Killing has always sought out the creative to make its point. The magazine's new publishing initiative, Cruelty-Free, and its new book Cruelty-Free, featuring the work of the world's leading animal-rights writers and activists, hopes to change that. "A lot of people who are interested in animal rights get very into it very quickly and are very avidly studying all the information and listening to all the arguments," Dominique Marcourt, creative director at Compassion Over Killing, told The Huffington Post. "I think there's this idea that if you're a really committed animal lover, all you have to do is read the most compelling arguments for animal rights and you will go vegan, and those arguments are really compelling." After two years of research and brainstorming -- and aided by former editor in chief of the New Yorker Dan O'Sullivan and author Jonathan Safran Foer, a longtime supporter of Compassion Over Killing -- Marcourt said the group is finally ready to introduce Cruelty-Free. The magazine will produce a monthly online and print publication based on the work of people like Foer, Henry Bergh, Steve Wise, Henry Spira and, later this year, John Robbins. The first issue of Cruelty-Free will include a four-part series on the animal- 6d1f23a050
